Summary

Senior Full-Stack Engineer with about 9 years of experience in gaming, fintech, telecom and data engineering, working mainly with Angular, React, Spring Boot (Java) and Node.js/NestJS. Experienced in AI-assisted and agentic development with Cursor, Codex and Claude Code, and open to remote contract and part-time roles.

Technical Skills

Frontend: Angular, React, Vue.js, Material UI, JavaScript, TypeScript, HTML, CSS

Backend: Java, Spring Boot, Node.js, Express.js, NestJS, PHP, Laravel, Python, REST, GraphQL, Apollo

Databases and Data: MongoDB, Cosmos DB, MSSQL, Redis, SSIS, SSRS, Azure Data Factory, Databricks, ETL

Cloud and DevOps: Azure, AWS, Azure DevOps, CI/CD, Docker, Control-M, Git

Architecture and Testing: Microservices, Monolithic Architecture, TDD, Unit Testing, Integration Testing, JUnit, Mockito, Postman, Playwright

AI-Assisted Development: Cursor, Claude Code, OpenAI Codex, MCP integrations (Figma, Playwright), Agentic Coding

Web3: EVM, MetaMask, TRON, TON Connect

Professional Experience

Senior Fullstack Engineer

CybillTek Software Inc. (2024 - 2025), now Anagenesis Inc. (2025 - Present) | Quezon City, Philippines

Senior full-stack engineer on a high-traffic online gaming platform with an affiliate program, using Angular and Spring Boot (Java). Works in a cross-border team of 6 local developers, 8 foreign developers, 3 business analysts and 5 mobile developers.

- Rebuilt the web app and mobile web app UI from the ground up in Angular, replacing a legacy UI, and delivered it to production for hundreds of thousands of users.
- Migrated 156 endpoints so far from an 8-10 year-old native Java backend to Spring Boot (3 services) using agentic coding with Codex; the migration is ongoing.
- Used Cursor with Figma and Playwright MCP integrations (and Playwright CLI) to build the new UI from designs and run browser tests.
- Introduced end-to-end testing with Playwright (about 108 scenarios) and wrote unit and integration tests (JUnit, Mockito).
- Integrated web3 wallet registration and login (EVM chains, MetaMask, TRON and TON Connect) and created the APIs that support them.
- Used Redis to store one-time passwords (OTPs), temporary tokens and other short-lived data.
- Led client-requested features, coordinating clarification questions with the business analyst (BA), and generated API documentation with an AI agent for the mobile team.
- Led Angular modernization while keeping legacy compatibility, and set and enforced coding standards.
- Added client-side encryption (Web Crypto API) and multi-language support.

Senior Fullstack Engineer (Part-Time, Remote)

FinAttune | Australia | 2025 - 2026

- Led development of a portfolio management platform for Australian clients (React, NestJS, Cosmos DB), working with the CEO and CTO.
- Led the migration from Express.js to NestJS and the move from a legacy UI to Material UI.
- Partnered with the CTO on architecture decisions, including Cosmos DB adoption.
- Set up the team's Git workflow and Azure DevOps CI/CD pipelines.

Technical Consultant (Part-Time)

Gallium31 Corporation | Makati City, Philippines | 2022 - 2026

- Designed Control-M jobs integrated with Azure Data Factory and led one ETL cluster for PRULIFE UK (IFRS17).

- Worked briefly as a data architect using Databricks, coordinating closely with data engineers to decide which fields to expose.
- Designed and maintained ETL pipelines in Azure Data Factory, moving data from diverse sources into target databases and warehouses.
- Migrated data workflow orchestration to Azure Data Factory for better automation.

Software Engineer, then Senior Software Engineer

Yondu Inc. | Taguig City, Philippines | 2019 - 2024 (Senior from 2022)

- Built microservices and back-end APIs for telecom, e-gaming and healthcare products, including Pitmasters (E-Sabong) and GoWiFi.
- Led the voucher distribution system for Globe partners such as GMovies and KonekTayo.
- Re-architected GoWiFi's back-end authentication and led a proof of concept for GuestWiFi's app provisioning.
- Applied TDD on Healthnow back-end services and assisted DevOps with Docker.
- Awards: Team Excellence Award 2022 Q2 and Q3 (Pitmasters); Sprint MVP 2021 Q2 and Q3 (GoWiFi).

Earlier Experience

- Front-End Developer, Leapfroggr Inc., Binondo, Manila | 2019: Vue.js and Vuex UI for the eClaims PhilHealth project.
- Software Developer, Signity Inc., Quezon City | 2018 - 2019: WordPress sites and an internal Laravel and Vue.js tool.
- Software Engineer, IHATECOMPUTER.COM, Quezon City | 2018 - 2019: database design, stored procedures and back-end services for a custom ERP.

Education

Bachelor of Information Technology

AMA University | Quezon City, Philippines | 2013 - 2017
